

ABSTRACT

LINK BETWEEN A CENTRAL SYSTEM AND A SATELLITE SYSTEM FOR EXECUTING OPERATIONS OF THE CENTRAL SYSTEM

5

In order to have operations of a central system (1) executed by a satellite system (30), a link (17) between the central system (1) and the satellite system (30) includes:

in the central system (1), a control card (9) that places said operations in one or more data blocks;

10

in the satellite system (30), a coupler (21) that sends through the link (17) to the control card (9) at least one read command to which the control card (9) responds by sending said data block or blocks through the link (17) to the coupler (21).
